

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
MCA (AI IoT)	National Institute of Technology, Patna	8.4	2026*
BSc Physics (H)	Amity University Kolkata	9.25	2022
Senior Secondary	CBSE	80.4	2019

PROJECTS

- Customer Segmentation Analytics** Feb 2026 – March 2026
Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Streamlit
 - Built an end-to-end customer analytics pipeline using the UCI Online Retail II dataset to transform raw transactional data into actionable customer insights.
 - Engineered RFM (Recency, Frequency, Monetary) features from 1M+ transactions and segmented 5,400+ UK customers using quantile-based scoring and behavioral grid mapping.
 - Identified that 35% of customers were inactive (hibernating) while Champions contributed 49% of total revenue, revealing strong revenue concentration.
 - Developed RFM heatmaps and revenue-distribution visualizations to support lifecycle-based marketing and retention strategies.
- Notes API Backend** Dec 2025 – Jan 2026
Tools: Go, Gin, MySQL, JWT, bcrypt
 - Built a production-ready RESTful backend in Go (Gin) using a clean handler-service-repository architecture for scalability and maintainability.
 - Implemented JWT-based authentication and bcrypt password hashing with strict user-level access control across CRUD operations.
 - Integrated MySQL with repository abstraction, environment-based configuration, structured logging, and rate limiting to enhance reliability.

SKILLS

- Programming Languages:** C++, Python, Go (Golang), Java, JavaScript (ES6+)
- Web Technologies:** HTML5, CSS3, JavaScript ES6+, REST APIs, JSON
- Databases:** MySQL, PostgreSQL
- AI / Machine Learning:** Python, NumPy, Pandas, Matplotlib, Scikit-learn, Basic TensorFlow, Basic PyTorch
- Data Science & ML Concepts:** Data Preprocessing, Exploratory Data Analysis (EDA), Supervised Learning, Regression, Classification, Model Evaluation
- Tools & Platforms:** Git, GitHub, Postman, Jupyter Notebook, Google Colab

AWARDS & CERTIFICATES

- Convolve 4.0 – Pan-IIT AI/ML Hackathon | Semi-Finalist**
Developed an AI/ML-based OCR system for invoice processing, achieving ~70% multi-field extraction accuracy; integrated Qwen LLM as a fallback when OCR confidence dropped below 80%.
- Shree Baljit Shastri Award | Amity University Kolkata**
Recognized for exemplifying human and traditional values, demonstrating respect for others and prioritizing the well-being and rights of others.

ACHIEVEMENTS

- NIMCET: AIR 656
- MAH CET: 99.64 Percentile
